

Barracuda NG Firewall Vx

Next Generation Security Protection

Cost Savings and Power Make this the Right Choice

More than a firewall, the Barracuda NG Firewall Vx delivers the power of a network security gateway. This virtual solution replaces several essential network security and networking infrastructure components — cutting costs while streamlining architecture and management. By combining advanced perimeter and application security with advanced LAN and WAN management tools, the Barracuda NG Firewall Vx provides a simplified, unified framework for managing total connectivity and security. Integrated with LDAP and Active Directory, the Barracuda NG Firewall lets administrators create granular user-based policies across security, application and connectivity services with unrivaled ease and power.

Security

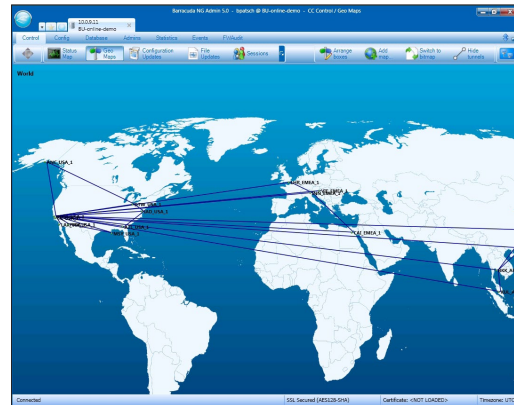

Integrating application and user awareness with an advanced network firewall, the Barracuda NG Firewall Vx protects network layers 2 - 7. Deep packet inspection and behavioral analysis accurately detect threats and activity from over 800 applications and protocols. It also provides IPS, antivirus, antispam, NAC, DoS protection and web filtering for layered protection.

Connectivity

The Barracuda NG Firewall Vx intelligently manages network links while also providing site-to-site VPNs and an SSL VPN for secure remote access. Its built in WAN optimization and uplink optimization capabilities prioritize important traffic while substantially reducing line cost.

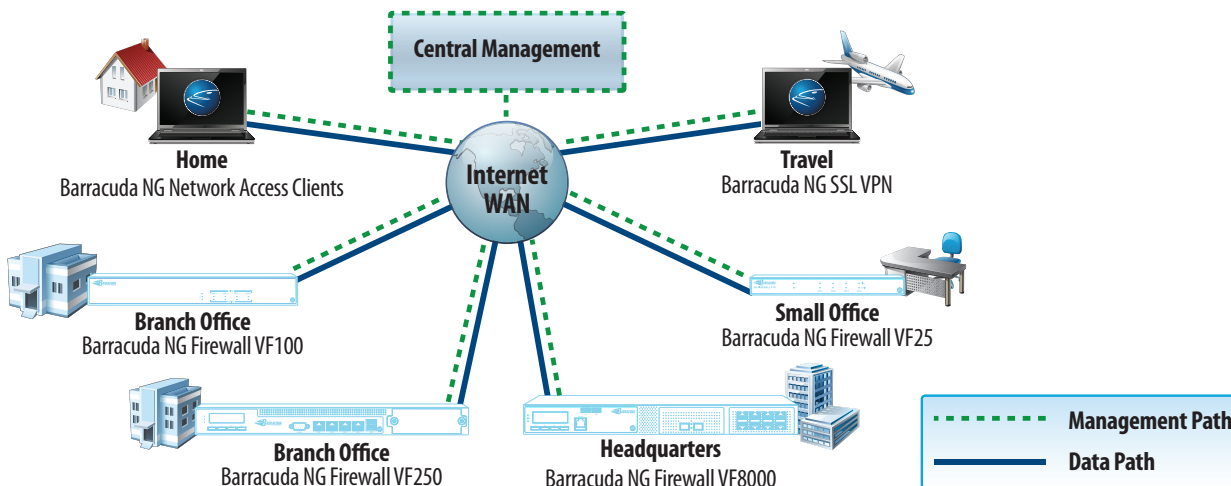

Management

The Barracuda NG Control Center delivers instant information on system and security activity while keeping security and networking features quickly accessible. At a higher level, the Barracuda NG Control Center extends consistent policies and visibility of Barracuda NG Firewall Vx's across the enterprise. With the NG Earth and the graphic tunnel editor GUIs, managing connectivity has never been more straightforward.

The Barracuda NG Firewall Control Center provides centralized, real-time monitoring of all the firewalls across the enterprise.

Easy to Use

Easy to remotely download and install in hosts around the world, Barracuda NG Firewall Vx is fast and easy to deploy. The intuitive UI puts system information and powerful tools for LAN and WAN management as well as security at administrators' fingertips. Energize Updates automatically keep security subscriptions like IPS and web filter up to date.

Affordable

The Barracuda NG Firewall Vx cuts costs several ways: It replaces several infrastructure components with one virtual appliance. Easy to manage, it keeps admin costs low. It lowers bandwidth costs by limiting bandwidth intense applications while using link aggregation with traffic shaping to further reduces bandwidth costs.

TECHNICAL SPECIFICATIONS

Firewall / VPN Features

FIREWALL

- Stateful packet forwarding
- Intrusion Prevention (IPS)
- Transparent proxying (TCP)
- NAT (src,dst,nets), NAT, PAT
- Object-oriented rule sets
- Dynamic rules / timer triggers
- Virtual rule test environment
- Jumbo frame support

TRAFFIC OPTIMIZATION

- Link monitoring and aggregation
- Policy routing
- Traffic shaping
- On-the-fly flow reprioritization
- WAN compression

INFRASTRUCTURE SERVICES

- DHCP server, relay
- HTTP, SSH, FTP proxies
- SMTP gateway and spam filter
- WiFi (802.11b/g) access point on select models
- Authentication – supports x.509, NTLM, RADIUS, RSA SecurID, LDAP/LDAPS, Active Directory, TACACS+, local authentication

PROTOCOL SUPPORT

- IPv4, ARP, IPv6 (2011)
- VoIP (H.323, SIP, SCCP [skinny])
- RPC protocols (ONC-RPC, DCE-RPC)
- 802.1q VLAN
- IPinIP and GRE tunnels
- OSPF/RIP router
- SNMP agent

VPN

- PPTP / L2TP (IPSec)
- Supports AES-128/256, 3DES, DES, Null ciphers
- Private CA or external PKI
- IPsec VPN clients for Windows, Mac, Linux
- Application-aware traffic intelligence across sites

HIGH AVAILABILITY

- Active-active[†] or active-passive
- Network notification of failover
- Transparent failover without session loss
- Encrypted HA communication

Security Options

- Barracuda NG Web Security
 - Barracuda NG Web Filter
 - Barracuda NG Malware Protection
- Barracuda NG Secure Web Proxy (HTTPS traffic inspection option)
- Barracuda NG SSL VPN and NAC
 - Clientless access from web browsers
 - Network Access Control validates client security access

Central Management Options

BARRACUDA NG CONTROL CENTER

- Standard Edition
 - 1 configuration grouping
 - Unlimited firewalls
- Enterprise Edition (1 tenant)
 - Single tenant
 - Unlimited configuration groupings
 - Unlimited firewalls
- Global Edition (multi-tenant)
 - Support for 5 tenants included
 - Unlimited configuration groupings
 - Unlimited firewalls
 - Additional tenant licenses available

Support Options

ENERGIZE UPDATES

- Standard technical support
- Firmware updates
- Layer 7 application definitions for control of more than 800 applications
- IPS including updates
